

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

M&G Global Dividend Fund

Sterling Class A – Income shares ISIN no. GB00B39R2M86

Managed by M&G Securities Limited

Objective and investment policy

Objective

The fund has three aims:

- To increase the income stream every year
- To provide a dividend yield above that available from the MSCI ACWI Index over any five-year period
- To provide combined income and capital growth that is higher than that of the MSCI ACWI Index over any five-year period.

Core investment: At least 70% of the fund is invested in the shares of companies from anywhere in the world.

Other investments: The fund may also hold cash or assets that can be turned into cash quickly.

Strategy in brief: The fund manager focuses on companies with the potential to grow their dividends over the long term and invests in company shares from across a wide range of countries, sectors and company sizes. The fund manager selects stocks with different sources of dividend growth to build a fund that has the potential to cope in a variety of market conditions. The fund invests with a long-term view of typically three to five years. When attempting to grow distributions, the fund manager's main focus is on delivering an increase in sterling terms.

Benchmark: MSCI ACWI Index

The fund manager makes active investment decisions for the fund. The benchmark is a target which the fund seeks to outperform. The target benchmark is used solely to measure the fund's performance and income objective.

For unhedged share classes, the benchmark is shown in the share class currency.

Glossary terms

Dividend yield: Annual income distributed as a percentage of the share price.

Other information

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund may be paid out to you quarterly.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
 - The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
 - Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
 - The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.
 - In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
 - The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Further details of the risks that apply to the fund can be found in the fund's Prospectus.

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	1.36%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

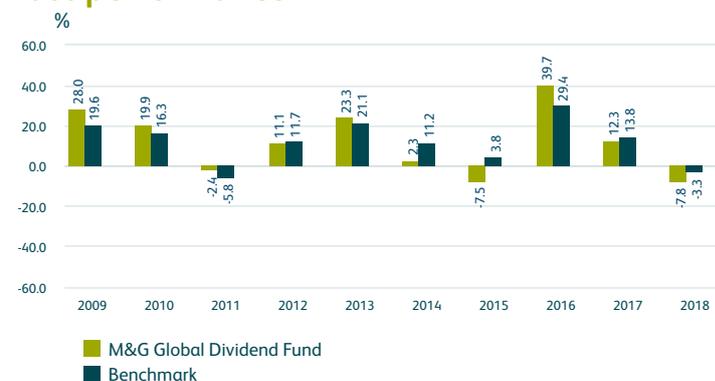

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 1 August 2019.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 1.40%. The fund's annual report for each financial year will include details on the exact charges made.

For Income shares, the ongoing charge is taken from investments held in the fund's portfolio and not from the income these investments produce. The deduction of this charge will reduce the potential growth of your investment.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- The past performance calculation includes UK taxes. It does not take into account the entry and exit charges but does take into account the ongoing charge and the performance fee, as shown in the charges section.
- The Fund launched on 18 July 2008 and the Sterling Class A Income share class launched on 18 July 2008.
- Past performance is calculated using Sterling Class A Income shares.

Benchmark:

01 January 2009 to 31 December 2011 - FTSE World Index
01 January 2012 to 31 December 2018 - MSCI ACWI Index

Practical information

The depositary is NatWest Trustee and Depositary Services Limited.
