## M&G Managed Growth Fund

a sub-fund of M&G Investment Funds (4)

Sterling Class A – Income shares ISIN no. GB0031960692

Managed by M&G Securities Limited

### Objective and investment policy

The fund aims to deliver combined income and capital growth, net of the Ongoing Charge Figure, that is higher than that of an index made up of 85% global company shares and 15% global bonds  
\*over any five-year period.

\* as measured by the MSCI ACWI Index and Bloomberg Barclays Global Aggregate Index, respectively.

**Core investment:** The fund will invest at least 70% of its assets in other funds to give exposure to a range of assets from anywhere in the world, including company shares, bonds, convertibles and cash. The fund may also invest directly in these assets. In aggregate, at least 70% of the fund's assets will be invested in company shares, either directly or via other funds.

**Other investments:** The fund also holds company shares, cash and warrants.

**Use of derivatives:** Derivatives may be used for investment purposes. They may also be used to reduce risk and costs.

**Strategy in brief:** The fund manager's investment views are mainly implemented by investing in other funds. This will typically be via M&G's own funds, but the fund may also invest in funds managed by other companies where appropriate in order to best reflect the fund manager's investment views. The fund has a flex'ble investment approach, with the freedom to respond to changes in economic conditions and the valuation of assets. The approach combines in-depth research to work out the value of assets over the medium to long term, with analysis of market reactions to events to identify investment opportunities. In particular, the fund manager seeks to respond when asset prices move away from a reasonable sense of "fair" long-term value due to the market's reaction to events.

**Benchmark:** 85% MSCI ACWI Index

15% Bloomberg Barclays Global Aggregate Index

The fund manager makes active investment decisions for the fund. The benchmark is a target which the fund seeks to outperform. The target benchmark is used solely to measure the fund's performance.

For unhedged share classes, the benchmark is shown in the share class currency.

#### Glossary terms

**Bonds:** Loans to governments and companies that pay interest.

**Derivatives:** Financial contracts whose value is derived from other assets.

**Warrants:** Financial contracts which allow the fund manager to buy stocks for a fixed price until a certain date.

#### Other information

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund may be paid out to you semi-annually.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

### Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

• The risk number shown is not guaranteed and may change over time.

• The lowest risk number does not mean risk free.

#### The main risks that could affect performance are set out below:

• The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

• The fund invests in other funds, which are subject to the risks associated with the type of assets held in those funds.

• The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

• Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

• In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

• The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.

## Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	1.40%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 1 August 2019.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 1.40%. The fund's annual report for each financial year will include details on the exact charges made.

For Income shares, the ongoing charge is taken from investments held in the fund's portfolio and not from the income these investments produce. The deduction of this charge will reduce the potential growth of your investment.

For more information on charges, please see the relevant sections of the Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

## Past performance

- Past performance is not a guide to future performance.
- The past performance calculation includes UK taxes. It does not take into account the entry and exit charges but does take into account the ongoing charge and the performance fee, as shown in the charges section.
- The Fund launched on 28 October 1994 and the Sterling Class A Income share class launched on 01 October 2002.
- Past performance is calculated using Sterling Class A Income shares.
