### What is this product?

#### Type

Charibond is a Common Investment Fund and qualifies as an Alternative Investment Fund.

#### Objective

Charibond provides a managed investment for the fixed interest portion of charities' investment portfolios. The fund provides charities with an actively managed portfolio of gilt-edged and other fixed interest stocks and deposits designed to produce a high income while preserving capital value.

#### Investment policy

The Charibond Charities Fixed Interest Common Investment Fund (Charibond) is designed to provide an investment for the fixed interest portion of charities' portfolios. As a common investment fund, any charity registered in the UK can invest in Charibond, unless prohibited by its trust deed, under the provisions of the Charities Act 2011. Charibond has an independent Board while M&G Securities Limited are the fund managers. The aim of Charibond is to provide charities with an actively managed fixed interest fund that invests in deposits, UK government bonds (gilts) and other sterling-denominated fixed interest securities, designed to produce a high income while preserving capital values.

#### Glossary terms

**Bonds:** Loans to governments and companies that pay interest.

#### Intended retail investor

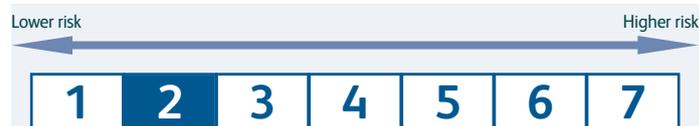

This product is for charities, with basic investment knowledge, seeking rising income and growth through an actively managed fund invested in bonds. Investors should be looking to invest for at least five years and should appreciate that their capital will be at risk and that the value of their investment and any derived income may fall as well as rise.

#### Term of the PRIIP

The fund does not have a fixed term. NatWest Trustee and Depositary Services Limited (the 'Trustee') can elect to wind up the fund in the future, in which case, you will be given notice.

### What are the risks and what could I get in return?

#### Risk indicator

**!** The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of M&G Securities Limited to pay you.

Any other risks materially relevant to the PRIIP not included in the summary risk indicator are described in the Scheme Particulars.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

## Performance scenarios

Investment of £10,000		1 year	3 years	5 years (Recommended holding period)

- This table shows the money you could get back over the next 1, 3 and 5 years, under different scenarios, assuming that you invest £10,000.
- The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.
- The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.
- The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.
- The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if M&G Securities Limited is unable to pay out?

NatWest Trustee and Depository Services Limited (the 'Trustee') is responsible for the safekeeping of the assets of the fund under a depository agreement. In case of default of M&G Securities Limited the assets of fund will not be affected. If the Trustee or its delegates fails to fulfil its regulatory and contractual obligations, equivalent assets/value will be returned to the fund.

If the Trustee or its delegates encounter financial difficulties, the fund could suffer a loss. Your charity may be entitled to compensation by the Financial Services Compensation Scheme (FSCS). The maximum level of compensation for claims against firms declared in default is £50,000 per person per firm. Further information about compensation arrangements can be found on the Financial Services Compensation Scheme website [www.fscs.org.uk](http://www.fscs.org.uk)

## What are the costs?

### Presentation of costs

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

### Cost over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.
