The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## M&G Global Enhanced Equity Premia Fund

a sub-fund of M&G Investment Funds (10)

Sterling Class I – Accumulation shares ISIN no. GB00BJ9ND142

Managed by M&G Securities Limited

### Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the ongoing charge figure, that is higher than the MSCI ACWI NUK Index over any five-year period.

**Core investment:** At least 80% of the fund is invested in the shares of companies, across any sector and of any size, from anywhere in the world, including emerging markets.

**Other investments:** The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

**Use of derivatives:** The fund may use derivatives to reduce the risks and costs of managing the fund.

**Strategy in brief:** The fund applies a systematic approach to the selection of stocks. Stocks are ranked on five key criteria or 'Factors': Value, Quality, Momentum, Volatility and Size. These rankings are then combined to provide a single 'score' for each stock. The weighting of each factor in the single score is determined by the fund manager. Historically, stocks exhibiting these characteristics (or Factors) have tended to deliver above-market returns (or equity premia). In constructing the portfolio, differences between the fund's characteristics and those of its benchmark (such as sector, country or risk factor weightings) may be constrained. Managing the fund in this way limits the degree by which the fund's performance is expected to deviate from the benchmark.

**Benchmark:** MSCI ACWI NUK Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used to measure the fund's performance and acts as a constraint on the fund's portfolio construction, as certain limits, such as constraints on sector or geographic exposure, may apply at any given time.

The fund is actively managed. Within the given constraints, the fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

You can find more information about the objective and investment policy of the fund in the Prospectus.

#### Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

**Recommendation:** This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

• The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown medium to high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

#### The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

## Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.30%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because the fund has only recently launched.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 0.30%. The fund's annual report for each financial year will include details on the exact charges made.

**For more information on charges, please see the relevant sections of the Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)**
