M&G Sustainable Multi Asset Balanced Fund

a sub-fund of M&G Investment Funds (4)

Sterling Class A – Accumulation shares ISIN no. GB00BN0W1G94

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to:

- limit the average volatility to 12% per annum over any five-year period, while providing a combination of capital growth and income over that period; and
- invest in assets which meet the fund's preferred ESG standards and/or those that have a positive societal impact through addressing the world's major social and environmental challenges.

Core investment: The fund typically invests directly in a range of assets, including company shares, bonds, cash and near cash from anywhere in the world. 20-60% of the fund is typically invested in company shares. Companies that are deemed to be in breach of the UN Global Compact principles and/or involved in industries such as tobacco or controversial weapons are excluded from the investment universe. Also excluded are companies involved in the extraction of oil and gas, and power production from coal, oil and gas or nuclear fuel. Assets selected for investment are required to meet the fund's ESG or impact criteria. 20-50% of the fund is typically invested in companies that have a positive societal impact. At least 70% of the fund is exposed to sterling.

Other investments: The fund may invest to a limited extent indirectly in other asset classes such as property and gold.

Derivatives: The fund may invest via derivatives and use derivatives to reduce the risks and costs of managing the fund.

Strategy in brief: The fund's approach to sustainable investment is to invest in securities of companies or governments that uphold high standards of ESG behaviour. The fund seeks to manage volatility and risk through flexible asset allocation across asset classes, sectors, currencies and countries. The approach also combines research to work out the anticipated value of assets over the medium to long term, with analysis of market reactions to events, to identify investment opportunities. The fund's volatility objective may limit potential gains and losses.

Benchmark: IA Mixed Investment 20-60% Shares Sector

The benchmark is a comparator against which the fund's financial performance can be measured. The sector has been chosen as the benchmark as it reflects the financial aspects of the fund's investment policy. The benchmark does not constrain the fund's portfolio construction. The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund within the constraints set by the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its simulated Net Asset Value has shown medium rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	1.05%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because the fund has only recently launched.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 1.05%. The fund's annual report for each financial year will include details on the exact charges made.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature
