M&G European Credit Investment Fund A Sub-Fund of European Specialist Investment Funds ("The Fund") Share Class E (Dis) (GBP) (Currency Hedged) (ISIN no: LU1942574903)

Objectives and investment policy

Investment Objective: The M&G European Credit Investment Fund ("The Sub-Fund") aims to provide a higher total return (the combination of income and capital growth and net of fees) than that of the ICE BofAML Euro Corporate Index over any five-year period.

Investment Policy: The Sub-Fund will invest at least 70% of its Net Asset Value in EUR-denominated investment grade corporate and government bonds and Asset Backed Securities.

- The Sub-Fund may invest up to 20% of its Net Asset Value in Asset Backed Securities.
- The Sub-Fund may invest up to 15% of its Net Asset Value in below Investment Grade Debt securities.
- The Sub-Fund may invest in Convertible Bonds including up to 10% of its Net Asset Value in Contingent Convertible Debt Securities.
- The Sub-Fund may hold up to 5% of its Net Asset Value in equity securities received as a result of restructurings or conversion. This limit does not include investment in preference shares.

The Sub-Fund will typically invest directly. The Sub-Fund may also invest indirectly via derivatives instruments to take both long and short positions to meet the Sub-Fund's investment objective, for efficient

portfolio management and for the purposes of hedging.

The Sub-Fund may also invest in other assets including Collective Investment Schemes, cash and near cash, deposits and other debt instruments.

Other Information: Shares in the Sub-Fund may be redeemed each business day. Redemption requests must be received by 11:00am Luxembourg time.

For income shares, any income from the Sub-Fund may be paid out.

The reference currency is EUR but subscription and redemption payments may be made in the share class currency only.

Risk and reward profile

- The risk category was calculated using simulated historical performance data and it may not be a reliable indicator of the Sub-Fund's future risk profile. This fund was categorised in risk class 3 because, in accordance with the investment policy, the value of the investments may fluctuate slightly. Consequently, both the expected return and the potential risk of loss may be moderate.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

Risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- **Market risk:** The value of investments and the income from them will rise and fall. This will cause the Sub-Fund price, as well as any income paid by the Sub-Fund, to fall as well as rise. There is no guarantee the Sub-Fund will achieve its objective, and you may not get back the amount you originally invested.
- **Credit Risk:** The value of the Sub-Fund may fall if the issuer of a fixed income security held is unable to pay income payments or repay its debt (known as a default).
- **Interest Rate Risk:** When interest rates rise, the value of the Sub-Fund is likely to fall.

- **Derivatives Risk:** The Sub-Fund may use derivatives to gain exposure to investments and this may cause greater changes in the Sub-Fund's price and increase the risk of loss.

- **Counterparty Risk:** Some transactions the Sub-Fund makes, such as placing cash on deposit, require the use of other financial institutions. If one of these institutions defaults on their obligations or becomes insolvent, the Sub-Fund may incur a loss.

- **Asset-Backed Securities Risk:** The assets backing mortgage and asset-backed securities may be repaid earlier than required, resulting in a lower return.

- **Contingent Convertible Debt Securities Risk:** investing in contingent convertible debt securities may adversely impact the Fund should specific trigger events occur and the Fund may be at increased risk of capital loss.
