

M&G (Lux) Global Corporate Bond Fund Euro Class A-H – Accumulation shares

Monthly Fund Review as at 31 January 2021

For investment professionals only

Fund description

The fund aims to provide combined income and capital growth that is higher than that of the global investment grade corporate bond market (as the Barclays Global Aggregate Corporate Index USD Hedged Index) over any five-year period. At least 80% of the fund is invested in investment grade bonds issued by companies from anywhere in the world, denominated in any currency. Investments are selected based on an assessment of macroeconomic factors such as economic growth, interest rates and inflation. Spreading investments across issuers, industries and countries is an essential element of the fund's strategy.

The main risks associated with this fund

For any past performance shown, please note that past performance is not a guide to future performance.

The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.

The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

The hedging process seeks to minimise, but cannot eliminate, the effect of movements in exchange rates on the performance of the hedged share class. Hedging also limits the ability to gain from favourable movements in exchange rates.

Further risk factors that apply to the fund can be found in the fund's Key Investor Information Document (KIID).

The benchmark is a comparator against which the fund's performance can be measured. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The investment manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

Fund performance prior to 7 December 2018 is that of the EUR Class A-H Accumulation of the M&G Global Corporate Bond Fund (a UK-authorized OEIC), which merged into this fund on 7 December 2018. Tax rates and charges may differ.

ESG Standard Glossary

Additional ESG specifications: In the context of M&G, these are funds managed with an explicit ESG objective, outcome or in accordance with specific ESG criteria, and will have a number of minimum exclusions in place.

Engagement: Interaction with company management on various financial and non-financial, including ESG, issues. Engagement allows investors to better understand how a company is undertaking its operations and how it is interacting with its stakeholders, as well as advising on and influencing company behaviour and disclosures where appropriate.

ESG integration: Describes the explicit and systematic inclusion of Environmental, Social and Governance factors in investment analysis and investment decisions. It underpins a responsible investment approach, and allows investors to

better manage risk and generate sustainable, long-term returns.

Exclusions: The exclusion or restriction of investments based on the sector in which they operate, the products or services they provide or for other specific criteria, i.e. they are deemed to be in breach of the United Nations Global Compact principles on human rights, labour the environment and anti-corruption.

Voting: As the partial owners of a company, shareholders have the right to vote on resolutions put forward at a company's annual general meeting. These resolutions include the re-election of directors, executive remuneration and business strategy, among others, and may include resolutions put forward by shareholders.

Important information

On 7 December 2018, the M&G Global Corporate Bond Fund, a UK-authorized OEIC, merged into the M&G (Lux) Global Corporate Bond Fund, a Luxembourg-authorized SICAV, which launched on 7 December 2018. The SICAV is run by the same fund manager, applying the same investment strategy, as the UK-authorized OEIC.

The M&G (Lux) Global Corporate Bond Fund is a sub-fund of M&G (Lux) Investment Funds 1.

Where a security has not been rated by Standard & Poor's, Fitch or Moody's, we may use M&G's internal credit rating. Based on a comparison of all available ratings for each security, the most conservative rating (S&P, Fitch, Moody's or M&G's internal rating) is taken into consideration. The ratings so identified are then expressed or converted into M&G's ratings format to obtain uniform information for all securities in the portfolio.
